Hi, Tim. We are of course concerned about preventing mold and indoor air quality issues. Let us know if you need assistance. Davis is probably the best contact. If he isn't available, then Erin.

**This message sent to Seattle office employees.**

Hello everyone,

Earlier this afternoon, we experienced a significant water leak on the 15<sup>th</sup> floor, where staff from OAWT were in the process of moving onto the floor. In addition, staff in the Office of Environmental Assessment were also affected by the large volume of water that migrated to a large portion of the southeast section of the 14<sup>th</sup> Floor. In addition to the water/moisture issues affecting primarily floors 15 and 14, there is a disruption of some water service on other floors.

Building management has stopped the leak and has begun addressing its impacts. We do not know at the moment how quickly the service interruption will continue, but expect that service will be restored within hours. We expect to provide additional information tomorrow.

Tim Hamlin
